

Webinar Series – Maintaining Aircraft Control by Mindstar Community Aviation

Loss of Control is on the NTSB most wanted list for 2015. Most loss of control accidents occur during the maneuvering phase, and often culminate in an inadvertent stall/spin. Find out what you need to know to avoid stall/spin accident scenarios. Presenter Rich Stowell has performed more than 33,000 spins and is the 2014 National FAASTeam Rep of the Year.

Directions: To register and for more information, visit www.communityaviation.com/rich-stowell/stall-spin-awareness

After registering, you will receive a confirmation email with instructions for joining the webinar on the GoToTraining platform. Check your email Spam folder just in case. Webinar hosted by Mindstar Community Aviation on GoToTraining.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
